

SAACKE Spare parts

Trustworthy, original and precision manufactured

SAACKE offers highest quality in spare parts

The prudent Plant Manager will ensure that essential consumable spare parts are stocked on site to ensure minimal downtime in the event of stoppage for all critical items of plant and machinery. SAACKE can advise on the essential components for a spare parts stock and items of a 'consumable' nature that should be replaced on a planned maintenance cycle under service contract. Spares for common products are carried by Service Technicians, stocked in Regional Offices, with a more comprehensive stock held in our main stores in Havant. Older products not in our current production programme may require special items to be manufactured with availability on a longer lead time.

For any obsolete components and controls superseded by the introduction of mandatory design codes, SAACKE can provide an upgrade path including fitting and recommissioning services. We will also recommend practical upgrades and best available technology that will deliver enhanced safety, energy efficiency or improved emissions performance to meet today's exacting design standards.

SAACKE guarantees to supply only genuine spare parts and fit for purpose for the specified contract. Purchase from SAACKE guarantees interchangeability and provides assurance for your operators and operational safety.

Spare parts are available for all SAACKE worldwide products, land based or marine. Parts for other burner makes, boilers and heat generating equipment can be sourced on request.

Advantages at a glance

- ✔ Certified interchangeability
- ✔ Warranty
- ✔ Reliable and extended service life
- ✔ High quality and performance
- ✔ Optimised safety for personnel and plant
- ✔ Concessionary fitting rates for Service Contract holders
- ✔ Support & peace of mind
- ✔ Local regional stocks and headquarters backup

SAACKE offers

- ✔ Advice on boiler plant selection with burner type matched to process load requirements
- ✔ Boiler consumables
- ✔ Boiler load scheduling controls
- ✔ Boiler-house Log Book
- ✔ Boiler-house Technical Risk Assessment
- ✔ Boiler Operator and Manager training (BG01)
- ✔ Burner Operator and Plant Manager training
- ✔ Burner spares
- ✔ Controls and instrumentation
- ✔ Combustion analyser supply, repairs and calibration
- ✔ Commissioning, 2-year and essential spares kits
- ✔ Encapsulated drawings
- ✔ Energy efficiency handbook
- ✔ Energy efficiency kits (oxygen trim and inverters)
- ✔ Export packing and labelling
- ✔ Liquid fuel pumps and heaters
- ✔ Modernisation of burners & controls
- ✔ Noise attenuation equipment
- ✔ Operating instruction manuals
- ✔ Overnight/same day delivery of spares in the UK
- ✔ Pre-packed overhaul kits
- ✔ Portable gas leak detectors
- ✔ Safety enhancement modifications
- ✔ Safety guidance notes
- ✔ Service contracts for burners & boiler plant
- ✔ Spares for boilers and ancillary equipment
- ✔ Upgrade path for obsolete items
- ✔ World wide spares delivery
